

DUROSHIELD^{v3} by

- Face remains clear and visible
- Maintains clean appearance
- Option to add a full color printed logo at the top
- Designed for long-lasting comfort and ease of breathing
- Easily sanitized on shift or between shifts
- Can be worn up when not in use

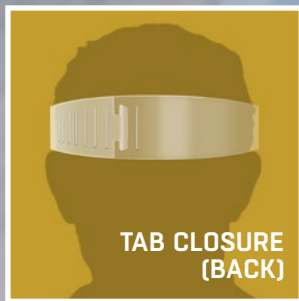

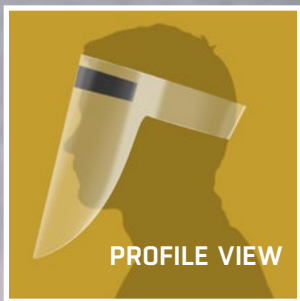

DuroShield v3 is a plastic face shield produced from 10mil clear APET plastic, flat elastic, and two plastic buttons. The elastic enables the shield to fit on any head size, while the unique button system holds the shield in place and allows for it to be worn in front of the face or flipped up on top of the user's head when face protection is not required. The plastic shield can be sanitized and reused easily.

DuroShield is a self-contained face shield produced from 10mil clear PET plastic. It is designed to wrap completely around the face covering the eyes, mouth and nose. The adjustable head strap has a self-locking mechanism and can accommodate any head size and can be worn with or without glasses and masks. The plastic shield can be sanitized and reused easily.

- Designed to fit onto an MSA V-Gard helmet
- Easily removed from helmet and sanitized for re-use
- Face remains clear and visible
- Designed for long-lasting comfort and ease of breathing
- Option to add a full color printed logo at the top

The hard hat version of our DuroShield is a custom die cut shield that self-locks into a standard issue MSA V-Gard helmet (any color). It is fully self-contained, it does not use any adhesives or foreign substances to adhere to the helmet. Instead, it self-locks into the slots on the side of the helmet and has 2 additional slots that fit into the brim of the hat for maximum sturdiness. It is made from 10mil clear APET.
